Personal Information:

Software Engineer with strong knowledge of full stack web development using the MERN stack, including MongoDB, Express.js, React, and Node.js. Skilled in developing RESTful APIs, building responsive and scalable web applications, and integrating frontend and backend systems. Experienced in database management, authentication, API integration, and writing clean, maintainable code. Proven ability to deliver real world freelance projects with a focus on performance, usability, and client satisfaction.

Work Experinece:

Software Developer Front-End & Beckend Web Development, <i>Fiverr & Freelancer.com</i>	07/2025 – Present Remote
Designed and developed responsive full stack web applications using React, Next.js, Angular, Node.js, Express.js, MongoDB, PostgreSQL, and Prisma ORM. Built RESTful APIs, integrated databases, and created modern user focused interfaces while optimizing applications for performance, SEO, and scalability. Delivered freelance projects across different industries with strong client communication and on time delivery.	
Front End web developer, Internshala Internships	09/2024 – Present Remote
Developed modern, responsive frontend web interfaces tailored to client requirements using HTML, CSS, JavaScript, React, and Next.js. Collaborated with clients to gather requirements and translate them into functional UI solutions. Built reusable UI components, implemented mobile-first design principles, and optimized websites for performance, accessibility, and cross-device compatibility.	

Education:

Bachelor's Degree in Computer Science, University of Embu(Embu Kenya)	09/2022 – 04/2026 Kenya
University of Embu Embu, Kenya September 2022 – Present	
Relevant Coursework & Technical Knowledge	
• Data Structures and Algorithms (DSA) • Web Development • Object-Oriented Programming • Database Systems • Software Engineering • Computer Networks • Problem Solving and Algorithm Design	

KEY SKILLS:

UI/UX Tools

Responsive Design, Mobile First Development, Accessibility, Figma, Canva

Backend Web development

Node.js Express.js, Mongo Db, Firebase Auth/ Firestore

Deployment and DevOps

Vercel, Netlify, GitHub Actions (CI/CD), Docker

AI / Machine Learning

Tensor Flow, Scikit Learn, Python, Model Training

Front End Technologies

HTML5, CSS3, JavaScript (ES6+), React, Next.js, Angular, Tailwind CSS

Build Tools

Git, GitHub, Vite, Webpack, npm

Other Skills

Performance Optimization, Debugging, Component Based Architecture

Skills – Communication & Collaboration

Teamwork, collaboration, independent working, clear communication, active listening, adaptability & problem solver

CERTICATIONS:

JavaScript (Intermediate) Certificate

HackerRank: Iframe link: <https://www.hackerrank.com/certificates/iframe/has4cheeef75>

Portfolio Projects:

Prisma ORM Neon Postgress SQL Database,

2026 – Present

<https://github.com/Maina-git/Prisma-ORM-NEONpostgress.git>

Built a backend focused web application to explore modern cloud database management and server side development

Enhanced my knowledge of connecting and managing Neon PostgreSQL databases in production environments

Implemented efficient database models and queries using Prisma ORM for scalable backend operations

Developed RESTful APIs and backend logic with structured routing and error handling using Express.js

Tech: Node.js, Express.js, Neon PostgreSQL, Prisma ORM, REST API

Trip Travel web app, <https://tripi-travel-app-ashen.vercel.app/>

Built a tourism web application showcasing global travel destinations with a clean and responsive user interface. Implemented SEO optimized pages and high performance rendering using Next.js. Designed modern, mobile friendly layouts using React and Tailwind CSS, and deployed the project on Vercel for fast and reliable hosting.

Blog App(Blog Haven):, <https://generationnow.netlify.app/>

Built a full stack blog application with secure user authentication and content management features. Enabled users to create, edit, and manage posts while integrating Firebase Authentication and Firestore for real time data handling. Developed a responsive and modern UI using React, TypeScript, and Tailwind CSS.

Job Portal Nextjs app, <https://job-portal-indol-seven.vercel.app/>

Built a job search platform with filtering and browsing features to improve user job discovery experience. Designed a responsive and modern UI optimized for multiple devices. Developed a scalable frontend architecture using Next.js, React, and Tailwind CSS for performance and maintainability.

Contacts Manager, <https://github.com/Maina-git/Depesh-Malvia.git>

Built a full stack contact management application for storing and managing user contacts securely

Implemented RESTful APIs with proper error handling and middleware using Express.js

Developed backend server architecture with authentication, CRUD operations, and MongoDB database integration
Designed responsive frontend interfaces and connected them seamlessly with backend services
Tech: Node.js, Express.js, MongoDB, React, REST API, JWT Authentication

365 Days of Backend Web development,

2025 – 2026

<https://github.com/Maina-git/365-Days-of-Backend-Web-Development.git>

Built a backend application focused on understanding server side development and API architecture using Express.js
Enhanced my knowledge of Express.js server setup, routing, middleware, and controller based architecture
Implemented structured RESTful APIs with organized routes, request handling, and reusable backend logic
Improved backend development skills through server configuration, error handling, and modular project structure
Tech: Node.js, Express.js, REST API, Middleware, MVC Architecture

Car Price Prediction Using TensorFlow and One-Hot Encoding,

<https://github.com/Maina-git/Car-Price-Prediction-Model.git>

Built a machine learning project for predicting car prices based on features such as brand, fuel type, mileage, and transmission
Enhanced my understanding of data preprocessing, feature engineering, and handling categorical data using OneHotEncoder
Implemented machine learning workflows using Pandas and Scikit-learn for data preparation and model training
Developed a neural network model using TensorFlow and Keras to improve prediction accuracy and performance
Tech: Python, TensorFlow, Keras, Pandas, Scikit-learn, Machine Learning
