📁 PORTFOLIO PROJECTS:

Trip Travel web app

Landing page

A tourism-focused website built with **Next.js**, showcasing the most beautiful and iconic destinations around the world — including Brazil, USA, France, Italy and more.

Live Demo: A tourism-focused website built with **Next.js**, showcasing the most beautiful and iconic destinations around the world — including Brazil, USA, France, Italy, and more.

Live Demo: <https://tripi-travel-app-ashen.vercel.app/> 🔗

Features

- Explore top destinations across multiple countries.
- Stunning visuals of famous landmarks and attractions.
- Travel insights and descriptions for each location.
- Built with **Next.js** for fast performance and SEO-friendly pages.
- Deployed with **Vercel** for smooth hosting and deployment.

Tech Stack

- Next.js 🔗 – React framework for production.
- React 🔗 – UI components.
- Tailwind CSS 🔗 (if you used it) – modern styling.
- Vercel 🔗 – deployment and hosting.

Blog App(Blog App4):

BLOC Haven is a full-stack web application built with **React (Reset.js)**, **TypeScript**, **Tailwind CSS**, and **Firebase**. The platform leverages **Firebase Authentication** to provide secure user sign-up and login functionality. Authenticated users can create, publish, edit, and manage their own personal blog posts, while also browsing content published by other users. All blog data is securely stored and managed using **Firebase Firestore**, enabling real-time access and scalability. The application enforces authentication-based access control, ensuring users can manage only their own content while freely viewing public posts from the community.

GitHub Repository: <https://github.com/Maina-git/BLOC-Haven.git> 🔗

Amazon Landing Page

This project is a simple **Amazon-inspired landing page** that displays products retrieved from Amazon-related data. It was built primarily to **test and demonstrate responsive web design skills** using **React.js** and **plain CSS** (no UI frameworks).

The application focuses on creating a clean layout that adapts smoothly across different screen sizes, including desktop, tablet, and mobile devices.

Key Features

- Responsive product grid layout
- Reusable React components
- Clean and minimal UI inspired by Amazon

PERSONAL INFORMATION:

Hi, I'm Francis, a passionate web developer who thrives on creativity and problem solving. What excites me the most about web development, is the perfect blend of technical challenges and artistic expression. From writing clean code to designing intuitive user interfaces, every step fuels my passion for the craft. The idea of creating something from scratch, transforming ideas into fully functional websites or applications with just a few lines of code, is truly thrilling for me. I embrace every opportunity to solve problems, whether it's debugging an issue or optimizing performance for the best user experience. Constant learning is integral to my journey in web development, and I stay ahead of the curve by exploring new technologies and design trends. For me, web development is not just a job it's a passion. I'm driven by the joy of creating things that others can interact with and enjoy.

WORK EXPERIENCE:

Self Employed Freelancing

Front End web developer

07/2025

Front-End Web Developer (Freelance)

Self-Employed | [Freelance.com](#)

Start Date: 07/2025 – Present

Overview

Currently working as a freelance web designer on the [Freelance.com](#) platform, delivering professional, responsive, and user-centered website solutions to clients across various industries.

Key Responsibilities

- Design modern, visually appealing, and fully responsive websites
- Create intuitive UI/UX layouts to improve user experience and engagement
- Collaborate with clients to understand business goals and translate them into effective designs
- Maintain consistency in branding, typography, and color schemes
- Optimize websites for performance, accessibility, and SEO best practices

- Mobile-first responsive design
- Built using **React.js** and **vanilla CSS**

Purpose of the Project

The main goal of this project was to:

- Practice responsive design principles
- Improve component-based UI development in React
- Strengthen CSS layout skills (Flexbox & Grid)
- Build a production-ready landing page structure

Job Portal Nextjs app

Job portal landing page

A modern **job search platform** built with **Next.js**, designed to help people explore opportunities and get hired. The website makes it simple to browse job listings, search for roles, and connect with hiring companies.

Live Demo: <https://job-portal-indol-seven.vercel.app/>

Features

- **Search for jobs** by title, role, or keywords.
- **Browse job categories** across industries and locations.
- **Company details** and job descriptions included.
- **Responsive design** – works on desktop, tablet, and mobile.
- **Next.js performance** – fast, SEO-friendly, and scalable.
- **Deployed on Vercel** with continuous deployment.

Tech Stack

- Next.js – React framework for building the app.
- React – component-based UI.
- Tailwind CSS (if used) – styling and layout.
- Vercel – deployment and hosting.

- Deliver projects on time while ensuring clear and professional communication

Tools & Technologies

- **Design:** Figma, Adobe XD
- **Development:** HTML, CSS, JavaScript
- **Platforms:** WordPress, Webflow
- **Approach:** Responsive & mobile-first design principles

Professional Approach

- Client-focused and detail-oriented
- Strong communication and requirement analysis skills
- Committed to high-quality design and reliable delivery

VPS Kings

Front End Developer

Self employed

Front End web developer

09/2022

I work as a freelance **Front-End Web Developer and UI/UX Designer on Fiverr**, delivering modern, responsive, and user-focused websites tailored to client goals across various industries.

Role & Responsibilities

- Design and develop **modern, visually appealing, and fully responsive websites**
- Create **intuitive UI/UX layouts** that improve usability, engagement, and conversions
- Collaborate closely with clients to understand requirements and translate ideas into functional designs
- Maintain consistency in **branding, typography and color systems**
- Optimize websites for **performance, accessibility and SEO best practices**
- Deliver projects on time while maintaining **clear, professional communication**

Tools & Technologies

- **Figma & Adobe XD** for UI/UX design and prototyping
- **HTML, CSS, JavaScript**
- **WordPress & Webflow** (project dependent)
- Mobile first and responsive design principles

Professional Approach

- Client focused and detail oriented
- Strong communication and requirement analysis

- Commitment to **high quality results** and **reliable delivery**

This experience reflects my ongoing work on Fiverr, helping clients build **professional, high performing and visually compelling web solutions** that strengthen their online presence.
